

Spectral Performance of Gold/Grey Reflective Blind Film

Notes:

1. This data is film only.
2. Data collected by spectrophotometer in accordance with NFRC Standards.
3. Transmission and Reflectance is expressed as a proportion between 0 and 1, it could easily be expressed as as 0% and 100%.
4. This graph shows that the Gold side (blue line) is more reflective than the Grey side (green line) although both sides are very effective.
